

Livestock enclosure permitting

May 11, 2007

Ms. Fleming,

Per our conversation, I have attached links to our websites that can help you better in the permitting process.

The link below explains what is required in express permits. The livestock enclosure made of chain link fence would fall under the fence permit. Again this is only required in Estate zones and Residential zones. In these zones the livestock enclosure would need to be setback 30 ft. from the neighboring property line. In Agricultural Zoning neither the permit or setbacks are required. Permits cost \$60.00 and can be applied for at 2800 N. Horseshoe Drive, Naples, Florida 34104 and received on the spot.

<http://colliergov.net/Index.aspx?page=168>

This link below will help you identify the most current zoning of any property within Collier County.

Simply input the address or parcel # and click on the appropriate zoom button. It is slow but very helpful.

Ms. Fleming please contact me via e-mail or telephone at anytime. I would be very happy to assist you with any questions or concerns.

Building Review and Permitting

Accessory Permits

These Permit Types are an example of Express Permit Types:

- Pools - Residential
- Screen Enclosures
- Sheds
- Reroof / Repairs *
- Fences
- Window / Door Replacements
- Air Conditioning Replacements *
- Docks
- Minor Electrical Work
- Lawn Sprinklers
- Propane Gas Tank Systems
- Siding Replacements *
- Decks

To submit an application for these Permit Types you will need:

1. 2 copies of a Site Plan, drawn to scale.
2. Construction Details on how the project will be constructed, remember, the more information you give us on the plans, the fewer questions we will have when you come in to apply.
3. 2 copies of any applicable Engineering required for the completion of the project.

Note: * Plans are not generally required for these Permit Types.
